Product Description

Contemporary air purifier combines DuPont HEPA filtration with a unique approach to delivering cleaner air. Sensing the air around you, TruSens automatically adjusts to the conditions of your air and is engineered to distribute purified air more effectively.

Features

- Cleaner air where it matters most. Placed away from the purifier, the SensorPod monitors air quality across the room to optimize clean air delivery throughout your space.
- Automatically adjusts fan speed in response to the SensorPod air quality readings
- TruSens keeps you informed. A color-coded illuminated ring and numerical value communicates good, moderate, or poor air quality.
- PureDirect technology uses two airflow streams to distribute air more comfortably, delivering purified air more effectively
- The 360 degree DuPont HEPA filter captures pollutants and VOC gases/odors from all directions. UV light reduces germs and bacteria that can get trapped in the filter.
- The contemporary design with sleek touch-button controls and integrated handle blend seamlessly into your environment
