### Product Description

Experience the difference with a new kind of air purifier that combines science, style and technology. Featuring DuPont True HEPA filtration, the TruSens Z-3000 collects pollutants and neutralizes odors by automatically adapting to changing air quality conditions in a room.

### Features

- Cleaner air where it matters most. Placed away from the purifier, the SensorPod monitors air quality across the room to optimize clean air delivery throughout your space.
- Automatically adjusts fan speed in response to the SensorPod air quality readings
- TruSens keeps you informed. A color-coded illuminated ring and numerical value communicates good, moderate, or poor air quality.
- PureDirect technology uses two airflow streams to distribute air more comfortably, delivering purified air more effectively
- The 360 degree DuPont HEPA filter captures pollutants and VOC gases/odors from all directions. UV light reduces germs and bacteria that can get trapped in the filter.
- The contemporary design with sleek touch-button controls and integrated handle blend seamlessly into your environment
